

Lecturer in Cyber Security

College of Business, Technology and Engineering

School of Computing and Digital Technology

Permanent

Full time – 37 hours per week

£39,906 to £44,746 per annum, depending on experience

Job number 118748

Closing date 23/08/2026 at 23:30

The role

We are seeking an outstanding individual who is passionate about their discipline, to make an academic contribution in the subject area of Cyber Security. Having achieved the National Cyber Security Centre (NCSC) full certification for excellence in Cyber Security for our MSc Cyber Security, your contribution to the more technical areas of teaching will be highly valued.

The range of courses and subjects taught will enable myriad opportunities to grow and develop your portfolio of knowledge in the discipline. You will contribute to the delivery and development of our innovative undergraduate and postgraduate programmes, helping to equip the next generation of Cyber Security practitioners.

We are very proud of our work environment, undergraduates, postgraduates, and research students work together alongside academic and support staff. The way we teach here is non-traditional, you will not be handed a menu of content to serve up to the students. Instead, we follow an applied, project-based approach to learning.

The Subject Group – Cyber Security and Computer Networks

The Cyber Security and Computer Networks subject group covers the following courses:

- BSc (Hons) Cyber Security
- BSc (Hons) Cyber Security with Forensics
- MSc Advanced Computer Networks
- MSc Cyber Security

The UG degrees in the portfolio have a common first year, and specialisms are introduced from the second year onwards. In the Cyber Security degree, strong working knowledge is required in the areas of Ethical Hacking, Network Intrusion Detection systems, and Computer Networks Security. In the final year the specialist modules encompass Advanced Penetration Testing and Information Security Management, Blockchain and IoT, and Virtualisation technology solutions such as Software Defined Networks. Areas such as Incident Handling and Hacking Techniques, Cyber Threat Intelligence and Digital Forensics, and Information Security Management particularly in relation to the ISO 27001 standard are also valuable to the group.

The School

The [School of Computing and Digital Technologies](#) (CDT) is a large and vibrant school engaged in taught programs, research and innovation, and knowledge exchange. All our UG and PG programs are underpinned by project-based learning, which facilitates embedding industry experience across all the programs. CDT is also home to the Centre of Excellence for AI and Robotics (CEAIR), a strategic hub for applied AI, robotics, innovation, and skills development. The Centre helps organisations prototype, test, and scale human-centred AI and robotics solutions that improve productivity, support workforce transformation, and deliver measurable social and commercial value. CEAIR combines cutting-edge research with applied delivery and their focus is not AI for its own sake, but AI that solves operational challenges, improves productivity, enhances services, and creates competitive edge.

CDT is in the top ten biggest computing Departments/Schools in the UK, with more than 2,500 students and nearly 100 staff. We teach a vast array of topics including: computer science, software development, data analytics/science, computer games development, AI, machine learning, cyber security, cyber forensics, advanced computer networking, cloud technologies, information technology management, robotics.

CDT is located right at the heart of Sheffield city centre, putting you right in the middle of this industry. Sheffield is home to a thriving digital and tech industry, employing over 21,000 people and generating billions of pounds in the region. Alongside our many connections with digital and tech businesses, we conduct our own work in industry. Steel Minions is our commercial games development studio, where students create and publish their own games on the PlayStation store. We also work closely with the Advanced Wellbeing Research Centre (AWRC), the Advanced Food Innovation Centre (AFIC), and the Centre of Excellence in Terrorism, Resilience, Intelligence and Organised Crime (CENTRIC).

Our students also work on live projects with businesses as part of their course, so there are plenty of opportunities to collaborate and set projects with industry, from Sheffield's many IT firms to the biggest names in computing. The School was heavily involved in is the South Yorkshire Innovation Programme (SYIP), a regional innovation initiative that helps small and medium-sized enterprises (SMEs) accelerate growth through collaboration with Sheffield Hallam University. Through the programme, businesses gain access to academic expertise, technical consultancy, student talent, and research facilities to develop innovative products, improve business processes, and explore new technologies. Within the School of Computing and Digital Technologies at Sheffield Hallam University, SYIP has supported a diverse range of companies, such as IG Tech, Tax Geeks,

Webmart, Cultura Creative, Amaze Lab or Titans, across sectors including artificial intelligence, data analytics, manufacturing, software engineering, and digital transformation.

As part of our School, you will gain access to extraordinary facilities and equipment, such as:

- The world's largest PlayStation development lab.
- Cyber security labs with the latest forensic equipment.
- Largest user of Microsoft Azure Lab services in the UK, bringing with it access to a wealth of cloud-based teaching resources.

You will also have some unique colleagues, in the shape of our humanoid robots Nao and Pepper and our pet robot dog MiRo.

Benefits

We offer [a wide range of benefits and opportunities](#) to pursue a rewarding and fulfilling [career](#) in a supportive environment.

Pension

The University currently enrolls eligible academic staff into the Teachers' Pension Scheme (TPS), a defined-benefit pension scheme.

Like many universities, we are facing well-documented financial challenges and are entering a period of negotiation with our recognised Trade Unions, including consideration of pension affordability for modern universities. We remain committed to providing our staff with a competitive reward and benefit offer.

[Find out more about the TPS](#)

Your professional development

If you are a new academic, you will have the opportunity to take the Postgraduate Certificate Teaching in Higher Education. This is a one-year tailored programme of study, designed to help you develop an evidence-based, reflective, and critical approach to academic practice.

The programme enables you to:

- Gain an academic qualification
- Become a Fellow (Advance HE)

You can enrol onto the programme when you join us, as long as:

- You don't already have a UK teaching qualification
- You have a minimum of 60 hours of teaching scheduled across the year, including some in both semesters
- You are joining us on a permanent contract, or a fixed-term contract of three years or more

If you are not eligible for the full programme, you will be able to discuss alternative development opportunities with your line manager.

Location

This role is based at [City Campus](#), a welcoming modern environment at the gateway to Sheffield, in the city centre.

[Find out more about getting to our campuses](#)

Flexible working/Job sharing/Hybrid working

We understand the need for a healthy [work-life balance](#). For this job we welcome applications for job-share, part-time and flexible working arrangements.

For academic staff, hybrid working arrangements are scheduled around student-facing time and business activity.

If you would like to work on a flexible/job-share/part-time basis, please contact Shahrzad from the 'Questions about this job' section below to discuss the options available for this role.

Questions about the job

For informal enquiries about this job, please contact Shahrzad Zargari (she/her), Associate Head of School, on:

Telephone: 0114 225 6921

Email: s.zargari@shu.ac.uk

Selection event

Our selection event data will be provided to the shortlisted candidates.

The selection event will include:

1. A 10-minute presentation on a technical skills/competency relevant to the advertised job specification (instructions will be provided if you are selected for an interview)
2. A 10-minute presentation on how you would teach this subject to a group of undergraduate/postgraduate students, what you would like them to learn, teaching style and how you might provide feedback to the students on their learning
3. A practical scenario/critique task

4. A panel interview

We want our selection process to be as inclusive as possible for everyone. If you are invited to the selection event, you will have the opportunity to ask for reasonable adjustments to enable you to thrive.

How to apply

All applications should be made online using the [Sheffield Hallam jobs portal](#).

Your application should include a CV and a supporting statement (which should be a maximum of two sides of A4) clearly demonstrating how you meet the 'Essential' and 'Desirable' criteria on the person specification below, using examples from your current and previous experience.

****Please note that we are also recruiting for an Academic Tutor in this subject area. Should you wish to be considered for that role in addition to the Lecturer role please read through the Job Description and Person Specification for the Academic Tutor (see the “search for jobs” section), and in your Supporting Statement demonstrate the Essential and where possible Desirable criteria. Please write at the top of your Supporting Statement if you wish to be considered for both job roles.**

To find out more, take a look at our [guide to applying](#).

We recommend you download the job description and person specification when you apply, as this will not be available once the job has closed.

Equity, equality, diversity and inclusion

We are proud of the rich diversity of our community. Our vision is 'Sheffield Hallam: A Culture of Inclusion'.

This means creating a diverse, inclusive and welcoming environment where people of all identities and backgrounds feel they belong.

We welcome your application irrespective of age, pregnancy and maternity, disability, sex, gender reassignment, sexual orientation, race, religion or belief, or marital or civil partnership status.

Job description

Job title: Lecturer

College/Directorate: Business Technology and Engineering

Grade: 7

Reports to: Associate Head of School

Direct reports: Academic Tutors/ Associate Lecturers (as appropriate)

Role Profile: 001390

Role purpose

Deliver an outstanding student learning experience through the design and delivery of high-quality, inclusive, and applied teaching grounded in the Scholarship of Teaching and Learning. In this role, you will actively champion student success by driving improvements in retention, attainment, and graduate outcomes.

To deliver, and where appropriate lead, scholarship and Research, Innovation, Knowledge Exchange (RIKE) and/or professional practice/ engagement, producing high-quality outputs and developing pathways to impact that strengthen curriculum quality, advance academic activity, support income generation and enhance the University's academic reputation and civic mission, working collaboratively within academic teams and with external partners.

Role-specific responsibilities

The post holder performs a range of duties and responsibilities from those listed below. The balance and priority of these will vary between Schools/ Institute and post holders.

- Design and deliver high-quality, inclusive and research-informed by the scholarship of teaching and learning activities creating engaging learning experiences that support student recruitment and retention, success, progression and employability; including research-led learning, projects, live briefs or professional practice-based

tasks, using evidence, feedback and data to enhance student engagement and outcomes.

- Contribute to and/or lead the design, development and continuous improvement of learning activities, digital resources and assessment strategies, using module review and student feedback to enhance learning and ensure alignment with quality assurance frameworks, external reference points and emerging pedagogic practice;
 - contribute to the design and delivery of assessment, including project or dissertation supervision where appropriate, ensuring alignment with learning outcomes and academic standards.
- Provide, oversee and quality-assure assessment and feedback processes within allocated modules within stipulated timeframes, ensuring constructive feedback that supports students learning, progression, academic integrity and achievement.
- Provide oversight and subject specific academic advice to support students' progression and engagement; ensure effective signposting and appropriate referral to pastoral and support services, acting as a first point of contact and triaging students to specialist support where appropriate, contributing to the enhancement of student outcomes across the programme.
- Lead or contribute to the operational management of modules and course management activities, projects or academic activities, when required/ appropriate, ensuring effective organisation, communication and timely resolution of day-to-day issues.
- Build and maintain relationships with external partners (e.g. employers, industry and professional communities), engaging with networks and partnerships to support curriculum development, employability, applied learning and student opportunities and enhance the student experience.
- Provide management and guidance to colleagues, including direct reports where appropriate; support work planning and contribute to performance management;
 - contribute to key HROD processes such as recruitment, induction, development planning and contribution to appraisal.
 - act as a point of escalation for colleagues, as and when required
 - contribute to the development of colleagues through mentoring, peer review or scholarship activity.
- Deliver, and where appropriate lead, scholarship of teaching and learning and RIKE relevant to the discipline, producing high-quality outputs such as publications, professional practice outputs, dissemination, or identifying and pursuing opportunities for external funding that strengthen curriculum quality and contribute to academic activity, including contribution to REF where appropriate.
- Engage in continuing professional development to maintain and enhance subject expertise, academic practice and professional standing, and contribute positively to academic communities through networking, collaboration and knowledge sharing.

- These duties may evolve in line with the changing strategic objectives of the college / department and University. Specific objectives will be agreed through the University's Performance and Development review (PDR) process.

This list is not comprehensive - we may ask you to carry out other duties appropriate to your grade.

Person specification

Here are the skills, experience, knowledge, and capabilities required to successfully carry out this job. As part of your application, you should show how you meet the Essential, and where possible the Desirable criteria, using examples from your experience.

Essential Attainment Criteria (academic or professional qualifications, titles etc)	Assessment method
Good honours degree (i.e. UK 2.1 or 1st Class), or equivalent professional qualification or experience in a relevant discipline	Application Certificate
Postgraduate qualification and/or equivalent professional experience in a relevant discipline	Application Certificate
Postgraduate teaching qualification (PG Cert or HEA fellowship) or a commitment to complete one	Application Certificate Interview
Desirable Attainment Criteria (academic or professional qualifications, titles etc)	Assessment method
PhD or equivalent professional qualification/ experience in a relevant discipline.	Application
Professional registration or membership of a relevant professional body (CII Sec, UK Cyber Security Council , or BCS)	Application Certificate

Essential Knowledge and Experience Criteria	Assessment method
Experience of teaching, training, supervision or professional practice involving the development of others, using inclusive and evidence-informed approaches at both undergraduate and postgraduate levels.	Application Presentation In-tray Interview
Well-developed knowledge and understanding of critical, practical and theoretical issues relevant to cyber security	Application Presentation In-tray Interview
Experience of contributing to professional or academic projects e.g. research innovation and knowledge exchange (RIKE)/	Application Interview

industry or creative projects, and/or scholarship aligned with responsible and open RIKE practices.	
Experience of working within complex regulatory or professional environments (e.g. academic or professional standards, policies and procedures)	Application Interview
Evidence of sustained and reflective professional development, with engagement in practice or scholarship and an emerging contribution to academic or professional activity	Application In-tray Interview
Desirable Knowledge and Experience Criteria	Assessment method
Experience of engaging with external partners and professional networks to support academic, professional or RIKE activity.	Application In-tray Interview

Essential Skills Criteria	Assessment method
Ability to design and deliver innovative, high-quality, inclusive and engaging learning experiences across a range of teaching mediums, informed by current practice and using evidence, feedback and data to enhance student engagement and outcomes.	Application Presentation In-tray Interview
Ability to inspire, challenge and support diverse student groups and colleagues, applying inclusive, equitable and evidence-informed approaches that contribute to student engagement and success.	Application Presentation In-tray Interview
Ability to support and, where appropriate, lead the work of others, including line management where required, contributing to performance, development and delivery of academic activity.	Application In-tray Interview
Excellent team working skills, with the ability to build effective working relationships with colleagues to support academic delivery, and provide support, guidance and emerging mentorship to colleagues, partners and students.	Interview
Excellent written and verbal communication skills with the ability to convey complex concepts clearly to a range of audiences.	Application Presentation Interview

Excellent planning and organisational skills, with the ability to manage competing demands and plan, organise and lead the coordination and delivery of academic activities and provision, ensuring deadlines are met.	Interview
Ability to support student engagement, wellbeing and progression through effective academic guidance, advising and signposting, contributing to positive student outcomes and experience.	Application In-tray Interview
Ability to contribute to and develop scholarship of teaching and learning (SoTL) and research, in line with university priorities and personal development ambitions, and to support their integration with teaching and learning, enhancing academic delivery and student success.	Application Interview
Ability to contribute to income generation (e.g. through enhanced student recruitment and retention; contribution to RIKE funding bids etc)	Application Interview
Ability to engage with external partners and professional networks, and contribute to wider academic or organisational priorities through participation in relevant groups and activities.	Application Interview
Ability to adapt to changing priorities in support of academic delivery.	Application Interview
Proficient in the use of IT systems; awareness and capability to learn and use new technologies, digital tools/platforms and specialist equipment	Application Interview

Other Relevant Information	Assessment method
Commitment to equity, equality, diversity and inclusion, and awareness of Sheffield Hallam University's organisational values mission.	Application Interview
Willingness to work flexibly including some weekends and evenings, e.g. to support open days (occasional).	Interview
Willingness to travel in the UK and overseas where appropriate (occasional).	Interview

Through our Research, Innovation and Knowledge Exchange (RIKE) planning process the university provides **Scholarship & Teaching** staff with the ability to apply for additional time to carry out RIKE activity, beyond time for academic development and research and scholarly activity. The additional allocation of hours is determined by quality thresholds and aligned to agreed objectives, and reflected in academic work planning, Personal Development Review and academic development processes. Staff whose work is included in the university's submission to the Research Evaluation Framework (REF) would normally be expected to follow this route.
